What This Means For Your Business

A plain-English summary of our findings and what to do next

THE OPPORTUNITY

No local brokerage is winning the content game in New Braunfels.

The national portals dominate listings — but local informational content is wide open.

The 3 Biggest Problems We Found

01

Every Page Looks the Same to Google

Your entire website uses the exact same title and description on every page — homepage, agent pages, foreclosure search. Google can't tell them apart, so it won't rank the right page for the right search.

Quick Fix: Write a unique title & description per page. A developer can do this in 1–2 hours.

02

Google Doesn't Know Who You Are

There's no structured data on your site — no machine-readable business info, no address, no service areas. Local search rankings depend heavily on these signals.

Quick Fix: Add LocalBusiness schema to your homepage. Takes about 1 hour of developer time.

03

No Original Content for Buyers & Sellers to Find

Your site is a listing feed with almost no written content. Buyers searching 'best neighborhoods in New Braunfels' find Zillow — not you. Content is how local agents beat national portals.

Quick Fix: Start with 4 pages — Canyon Lake guide, Gruene guide, Buyer Rebate page, VA/Military page.

BIGGEST QUICK WIN

Nobody is ranking for 'buyer rebate New Braunfels TX' or 'veteran realtor New Braunfels' — yet.

One dedicated landing page for each could rank within 60–90 days and directly drive leads.

Your 90-Day Ranking Roadmap

Three focused sprints to move from invisible to competitive

01 MONTH 1
